DPD-6289-59

17 September 1959

MEMORANDUM FOR:

DAD/SI

SUBJECT : DPD Comments on "Application of Manned Aircraft and Guided Missiles to Limited War"

1. The projects considered in the scope of the Ad Hoc Group's evaluation may, at some time, have a potential application or serve as useful instruments in Agency air operations. At this time it would be difficult to specifically tie down an honest requirement as to a specific need for the items presented on page 1, since anything dealing with new or modified systems of radar, aircraft, etc., may develop into a desired product at a later date as their operational applications and performances become known.

3. The document itself was most provocative, and we are very appreciative. We have a continuing interest in any advance recommendations or studies pertaining to clandestine air operations.

SIGNED

**WILLIAM BURKE
Colonel, USAF
Acting Chief, DPD-DD/P
